SUMER RAINS

Rain is the big prize
blue rain of water
grass of green rain
red rain of fire
rain of every color.

Water brings life to the forest. There we can find musician gnomes, snakes, beetles, and a wizard. The wizard leads us through different paths and so we can see the games, fights and love affairs of the forest dwellers. From the love between two snakes will come the egg that everyone wants to own. Following the events, we'll witness the birth of the great firefly, and we will take part in the great final party.
